

The management of **Laboreo de Conservación S.A.**, aware of the importance of the quality and food safety of its activities (sale of cereals and other grains for human and animal feed) and the satisfaction of our customers, has decided to implement and maintain a Food Safety Management System based on the ISO 22000:2018 and EFISC-GTP v4 schemes, as a commitment to continuous improvement and compliance with regulatory requirements applicable to our activities and products.

For all these reasons, the management of **Laboreo de Conservación S.A.**, establishes the following Food Safety Policy (reference framework for establishing and reviewing food safety objectives) and commits to apply it at all levels of the organization or to any interested external party and to provide the necessary resources for its compliance, based on the following guidelines:

- Rigorous compliance with the needs and expectations of our customers and stakeholders, offering high quality and food safe grains (especially cereals) and seeds.
- Development and implementation of strict hygienic-sanitary controls, as a factor related to the final quality and safety of the product.
- Flexible organization with the possibility of collaboration with other companies in the agri-food sector, usually participating as partners or investors.
- No transgenic grains are distributed or cultivated.
- Promotion of the development of natural and organic products through their commercialization, as well as participation as members of the Andalusian Committee of Organic Agriculture (CCAIE) since 2007.
- Knowledge, professionalism, specialization, and experience of our staff, promoting training and continuous updating of their knowledge, particularly in relation to the quality and food safety of our products.
- Environmental commitment through the commercialization of organic products.
- High capacity in incident resolution, as well as a short response time.
